TerraTec AXON Technologies appoints the PB Music Group as new distributor for Germany, Benelux and Denmark

AXON Technologies, March 7th, 2008 (ictw) – AXON Technologies are happy to announce that from April 2008 the fastest Guitar-to-MIDI System on the market will be distributed by the PB Music Group in Benelux, Germany and Denmark.

Due to their great expertise, the PB Group was the obvious choice for AXON even more as PB is also responsible for the distribution of the highly acclaimed Godin brand of guitars and basses which are known amongst other features for their excellent built-in 13pin Piezo pickups in the Godin SA series which make them the perfect instrument for the AXON controllers.

Rien Kolster, General Manager of the PB Music Group: *"With the addition of AXON technology products to our existing productline, we underline our goal to put a high focus on quality products only. AXON Technologies products stand for high quality, innovation and affordability. We are very pleased that AXON chooses the PB Music Group as their partner."*

Udo Moellhoff, International Sales Manager AXON Technologies states: *"The agreement with the PB Music Group reflects our commitment to the AXON product line. Due to the long experience of PB in the MI and especially the guitar market, this decision will surely help us to optimize our support for the dealers and to improve our presence in Germany, Benelux and Denmark."*

AXON Guitar-to-MIDI systems opens up the great wild world of MIDI to Guitar Players. With its ultra fast tracking technology guitar players are able to play any synthesizer or virtual instrument with their favorite instrument, the guitar! Additionally AXON allows for programming music with sequencer software via MIDI as well. This means that guitar players can be the music producer they always wanted to be, without the need to work with (from a guitar players perspective) quirky keyboard controllers.

The contact addresses in the territories are:

Germany, Denmark & Benelux:
